CDI – Taking the Global View

As pension investors find themselves in negative cashflow, they are looking for assets that help to match their cashflow requirements and deliver long-term return principally in the form of income. While domestic sterling assets are the best theoretical fit, the sterling markets lack the capacity to satisfy UK pension needs. In this session, Sorca Kelly-Scholte sets out the case for taking the search for asset cashflow global, and in particular to the US, where there is much greater capacity and where deeper markets allow for better diversification of the associated risks.

SORCA KELLY-SCHOLTE, HEAD OF EMEA PENSIONS SOLUTIONS & ADVISORY, **J.P. MORGAN ASSET MANAGEMENT**

Cash Flow Driven Investing

Credit is an asset class that is well suited to the needs of a mature pension scheme as it provides return, cashflow and liability hedging. We believe that the focus should be on each scheme's specific cashflow and hedging requirements. To that end, managers need to have the appropriate tools to mitigate risk and provide the required realised rate of return. Given current market conditions, we will be sharing our views on how we believe credit portfolios can best be structured to balance attractive returns with the required security and liquidity to meet ongoing cashflow requirements.

PAUL SKINNER, INVESTMENT DIRECTOR AND FIXED INCOME PRODUCT MANAGER, **WELLINGTON MANAGEMENT**

10.50 **Coffee / Tea**

11.10 **Multi Assets**

MODERATOR: **NIGEL STAPLETON**, CHAIR OF TRUSTEES, NATIONAL GRID UK PENSION SCHEME

Avoiding False Precision – the Importance of Preserving a Plan B

The temptation with maturing pension funds is to try and lock in a watertight 'Plan A' through an intricate matching strategy. However, given the 'known unknowns' around longevity, managing funding gaps and increasing transfers out, we would argue that it's important to maintain flexibility and the option to move to a Plan B should the situation change. This Plan B involves providing both growth and income and the ability to toggle between them dynamically as the maturity profile involves. Indeed we would suggest that holding a wider range of assets, beyond just fixed income sensibly keeps your options open and mitigates the risk of the cash reserves running dry.

SIMON LEVELL, MANAGING DIRECTOR CONSULTANT RELATIONS & **NISHA THAKRAR**, CLIENT SOLUTIONS SPECIALIST, **CAPITAL GROUP**

Multi Asset Credit: Capturing Income and Minimising Volatility in Credit Markets

Capturing income whilst minimising volatility should be a key consideration for maturing pension schemes. Alternative credit enables the de-risking of portfolios away from equities while maintaining attractive expected risk-adjusted returns. As the relative value between different credit asset classes shifts over time, Multi-Asset Credit (MAC) investing enables tactical and dynamic asset allocation to profit from a broad range of opportunities, mitigate risk and manage duration. MAC strategies seek to capitalise on the most compelling individual credit opportunities and to capture relative value opportunities between different credit asset classes and across geographic regions over time. To achieve this, MAC investing requires deep fundamental research and agile portfolio management.

DAVID RAE, MD, HEAD OF STRATEGIC CLIENT SOLUTIONS, **RUSSELL INVESTMENTS**
