MBSS SECURITY:  
THE FULL  
SECURITY  
SOLUTION

## OUR EDGE: YEARS OF EXPERIENCE

### ONE SERVICE ONE SUPPLIER

Set up in 1983, MBSS UK offers a complete security service and solution for companies and individuals who need things doing discreetly and doing well.

Whether it is security for commercial build, private residence or electronic system installation we cannot be beaten. We cover the whole security spectrum allowing clients to get exactly what they want, and when they don't know what they want, we advise and implement. Too many projects have too many suppliers, we are military led and therefore provide in a military fashion.

### WHO WE ARE

MBSS is made up of a thoroughly professional team that has graduated from the world's most formidable academies. This team provides an unmatched service every step of the way from conception to conclusion: a trusting partnership on which you can totally rely, with loyalty and confidentiality. No matter in which capacity we are engaged you can rely on total dedication to client satisfaction, a goal we constantly achieved through meticulous planning, management, coordination and communication.

## OUR PLANET: HOW WE DO OUR BIT

We are currently the only security company that operates a fleet of electric patrol vehicles, and with each car having a full operational range of pure electricity they have plenty of capacity to cover the required area.

### REDUCING OUR CARBON FOOTPRINT

As you can imagine, with our cars on call 24hrs a day we used to use a vast amount of fuel, so it was decided that MBSS would switch to a fleet of BMW i3's, reducing not just our own carbon footprint, but that of our clients as well. This is the first major step in becoming a carbon neutral company and will help play a part in the cleaning up of our ozone.

## OUR SERVICES

We pride ourselves on the standard of our teams who carry out their duties in a professional and courteous manner whilst maintaining complete focus, ensuring that all your requirements are met. First impressions count and day-to-day management is key, once in place we ensure day-to-day life runs seamlessly.

## PERIMETER FENCING

With a partnership established for over 20 years and operating from a large depot in South West England we are able to supply, install and maintain fencing and gates across a wide range of sectors over a large geographical area. We also assist our clients in their designs and product selection, and are able to fabricate bespoke fencing elements, such as gates, from our workshop facilities. We save you money as we ensure all planning is correct from conception, if you don't need it we won't do it!

## PHYSICAL SECURITY

We can provide a full security and surveillance service to ensure that the safety of assets and staff are fully met. These include: Perimeter security; High end Security doors, windows, Static guarding and technical solutions.

## TOMORROW'S TECHNOLOGY, TODAY

# CCTV & ALARM SERVICE, INSTALLATION & MAINTENANCE

CCTV has become a part of all our everyday lives. The reason is clear, CCTV is one of the major contributing factors of transferring crime away from your property or business.

Four major factors are to be considered before deployment of CCTV or Alarm Systems:

- Quality Of System
- Cosmetic Appearance
- Record & Playback Ability
- Data Access (View from anywhere via mobile or PC)

MBSS consultants will take you through every step of the process from survey to installation ensuring you have the most appropriate equipment deployed for your needs. We use the principals of defence learnt in the first World war to ensure your business and residence has the depth of security it requires.

## MAKING EVERY STEP COUNT

### CCTV AND ALARM MONITORING

Whilst the country sleeps, the criminal awakens and goes about his business. MBSS not only install the security solutions but they monitor them throughout giving the client a true 24/7 security service. With our mobile reactive patrols each client has its very own virtual Police force without having to get out of bed.

### ADVICE YOU CAN COUNT ON

Our team is made up of ex Police and Special forces drawing on experience gained from first hand involvement in residential security and criminal threat investigation. This ensures all weak areas of a residence / property or estate are identified and measures implemented to reduce risk. Sometimes it's better to break in, in order to make it easier to keep criminals out.

## FULL SOLAR FARM SECURITY SOLUTION AND MONITORING

Renewable energy is in demand and much of the country is being sold to Solar farm projects. When you are embarking on building a Solar farm you will very quickly recognize that the list of suppliers gets bigger and bigger. Security itself could have three / four different suppliers.

With MBSS this list goes down to one very professional and experience team.

- Security consultancy
- Manned Guarding
- Asset protection and control
- Perimeter fencing
- CCTV, Sensors and remote Speakers
- Remote 24/7 monitoring

# PROFESSIONAL AND EXPERIENCED
