The University of Minnesota is an equal opportunity educator and employer.

Creation Date: Tuesday, March 17, 2020
The University is committed to monitoring and improving students’ educational experiences. Student Ratings of Teaching (SRT) help to ensure that the student voice is present in fulfilling this mission. We encourage all instructors to incorporate student feedback into your ongoing efforts to improve your teaching and your courses.

**How SRT Results may be Used**
Evaluations of teaching provide information intended to help improve teaching, and may also be available to assist students in course selection and/or to inform administrative decisions on salary, tenure, and promotion. Specific use of SRT results may vary by campus and/or college as described in relevant university or unit policies.

**Resources for Improving Instruction**
Tools and tips for improving course instruction can be found on the OMS website (oms.umn.edu/srt), under the faculty section.

Among the available resources is a guide for connecting your teaching practices with the SRT. This guide was created by the Center for Educational Innovation (cei.umn.edu) and provides suggestions for improving instructional practices in relation to SRT items.

**About this Report**
This report contains all ratings provided by the students in your courses who submitted SRT responses. Mean (average) scores are reported as well as the frequency of how often each response was given for each item. Results are provided in the following order:

1. Score graph and frequency graphs for instructor items
2. Score graph and frequency graphs for course items
3. Electronically-administered SRTs*:
   - Comments regarding instructor
   - Comments regarding course

* Paper-administered SRTs: completed forms, with comments, will be returned to the campus address on record for the instructor

For additional information about evaluation of teaching, please reference the Evaluation of Teaching policy for your campus. The policy for Twin Cities, Crookston, Morris, and Rochester can be found here: http://policy.umn.edu/education/teachingevaluation.

Sincerely,
Rebecca Ropers
Vice Provost for Faculty and Academic Affairs

<tbody>
<tr>
<td>Facilitated good class discussion.</td>
</tr>
<tr>
<td>I love the book he wrote to explain the behind the scenes aspects of urban development.</td>
</tr>
<tr>
<td>Engaged in discussions that were less academic and more practical</td>
</tr>
<tr>
<td>Peter was and is passionate about the topic, which makes learning enjoyable.</td>
</tr>
<tr>
<td>Lecture, good assigned readings</td>
</tr>
<tr>
<td>Enthusiasm about subject and insights from experience</td>
</tr>
<tr>
<td>Shared extensive personal experience with the subject matter</td>
</tr>
<tr>
<td>Clear, balanced presentation combined with good listening skills.</td>
</tr>
<tr>
<td>Providing real life examples. Showing examples and having the walking tour to point things out &quot;live&quot;</td>
</tr>
<tr>
<td>He integrated practical approaches to enhance the understanding of the theory matter.</td>
</tr>
<tr>
<td>Had everyone share short summaries of each of their three papers after they were turned in! So often you write a paper for a class and have no idea how anyone else approached the topic or if they had difficulty with certain parts of the topic, etc. It really took away any feeling of competition, because we were all sharing with each other, and could see the way someone’s comments in class affected someone else’s paper, etc.</td>
</tr>
<tr>
<td>Gave details about urban public realm that provided needed insight</td>

## What suggestions do you have for improving the course?

<table>
<thead>
<tr>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>expanding class to a full semester</td>
</tr>
<tr>
<td>Fewer and/or shorter readings</td>
</tr>
<tr>
<td>Restructure student presentations</td>
</tr>
<tr>
<td>I think making the course a full–semester would be beneficial in spreading the readings out a little bit to allow for more engaged class discussions. Having more small–group and/or whole–class discussions would also be more effective. I don’t know if student paper presentations were the best use of class time.</td>
</tr>
<tr>
<td>better–led discussions</td>
</tr>
<tr>
<td>May be try incorporate aspects related to climate change and creating co–spaces for animals and humans could help the course. However, I understand that this may not be the interest area for everyone taking this course.</td>
</tr>
<tr>
<td>Should be a 1–semester class because the topic is so complex!</td>
</tr>
