

Environmental Policy of Clean Sweep SW Ltd

We believe that we are responsible for implementing an achievable environmental strategy that will result in good environmental practice and we always endeavour to operate in a sustainable manner.

We therefore commit to reducing our environmental impact as much as possible and will continually monitor and improve our environmental performance. Our environmental policy will form an integral part of our operating methods and business practices going forward

We will also encourage our staff and suppliers to do the same, as we feel it is not just sound business sense, but is also part of our obligation towards our environment.

Our policy is to:

- Support and comply with the requirements of current environmental legislation and codes of practice
- Reuse or recycle as much as possible keeping waste to a minimum
- Minimise energy (lighting and heating) and water usage in our office, vehicles and operating processes in order to conserve supplies, and minimise our consumption of natural resources and to encourage our staff to do the same when visiting customer homes and premises
- Operate and maintain company vehicles (where appropriate) with due regard to environmental issues as far as reasonably practical and encourage the use of car sharing where appropriate.
- Operate a policy of continued improvement in respect of air, water, noise and light pollution from both our premises and customer homes/premises and take care to reduce any impact that our business operations may have on the environment and local community
- Wherever possible purchase environmentally friendly cleaning products that do the least damage to the environment
- Assess the environmental impact of any new products or processes we intend to introduce in advance

For any issues related to Environmental Policy linked to this business please contact:
